

C#/ Web Developer

C#/ Web developer required to join a busy IT team for a leading independent Consultancy to work on redevelopment of the core software products.

The successful developer will join a prestigious and successful consultancy, developing a suite of Web/Windows/Mobile based applications. This exciting opportunity requires a talented developer to deliver to a challenging programme.

Skills required

- Solid skills in C# with .NET Framework, SQL Server, AJAX, CSS, ASP.NET and XML.
- Experience with Microsoft Enterprise Library, Vb.Net, VBA, Microsoft Access, compression and encryption technologies would be advantageous.
- Experience of both Desktop and Web application development.
- Experience of mobile development in iOS, Android and Windows would be advantageous
- Knowledge of Microsoft Tools and web/windows based multi-tier architectures.
- Good degree and the ability to acquire skills and solve complex problems in a challenging and enjoyable environment.
- Excellent oral and written communication skills.
- Proven development experience.

Key Responsibilities

- Design, develop and test software and solutions to fulfil requirements with agreed timescales.
- Work with clients, consultants and surveyors to understand and analyse their needs and ensure these are catered for in proposed solutions.
- Understand existing systems and work with team to make ongoing improvements to products and processes.
- Provide excellent levels of documentation.
- Provide support for installation and user training requirements.
- Support clients and their users with day to day operation of the products.

Additional requirements

- UK Driving License
- Applicant may need to undergo a background check before starting with Hydrop to fulfil the requirements of some of our Clients.
